Numbers Fractions Decimals	Numerical Operations Numerical Relations	Graphs Related Changes	Line Graphs	Bar Graphs	Pie Graphs	Probabilities Logical Relationships Review

Lesson Types

This course develops the English language skills necessary to do business over the telephone, understand and make numerical presentations, participate in question-and-answer sessions involving the exchange of numerical information, and present information in graphs and charts.

Intensive **listening practice** helps with crucial aural distinctions such as "fourteen" and "forty". Fractions, numbers, and decimals are studied carefully to help learners understand and express numbers with complete accuracy.

Students practice English expressions for describing **formulas** and **other numerical relationships**.

Content is based on useful economic and demographic data. Practice with graphs and charts develops **presentation skills**
